

ALPS | CORECOMMODITY MANAGEMENT COMPLETECOMMODITIES® STRATEGY FUND

JCRAX | JCRCX | JCRIX

September 30, 2017

Description

- The Fund seeks to maximize real returns, consistent with prudent investment management. The Fund provides investors with comprehensive access to commodity assets like oil, gold, wheat and corn. The Fund invests in the equity securities of commodity-related companies and commodity futures-related investments, collateralized by U.S. Treasury Inflation Protected Securities, and may also invest in commodity futures contracts and physical commodity ETFs. The Fund is actively managed and uses quantitative models to help reduce "Contango," or costs associated with replacing expiring futures when new contracts are more expensive.

The Benefits

- Commodities have historically provided investors with an effective hedge against inflation. *Past performance is no guarantee of future results.*
- Adding commodities to a portfolio of stocks and bonds may enhance diversification, though diversification may not protect against loss.
- Commodities can help capitalize on growth in emerging economies and rising demand for raw materials.

The Benchmarks: Bloomberg Commodity Index (Total Return) and Thomson Reuters/CoreCommodity CRB Index (Total Return)

¹ Fund performance for 2010 is from June 29, 2010, the inception date for the Fund, through December 31, 2010.

Performance less than one year is cumulative.

Performance data quoted represents past performance. Past performance is no guarantee of future results and investment returns and principal value of the Fund will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. The Fund imposes a 2.00% redemption fee on shares held for less than 30 days. Performance shown does not include the redemption fee, which if reflected would reduce the performance quoted. Current performance may be higher or lower than the performance quoted. Call 866.759.5679 for current month end performance.

Maximum Offering Price (MOP) for Class A shares includes the Fund's maximum sales charge of 5.50%. CDSC performance for Class C shares includes a 1% contingent deferred sales charge (CDSC) on C shares redeemed within 12 months of purchase. Performance shown at NAV does not include these sales charges and would have been lower had it been taken into account.

Important Disclosures & Definitions

Investors should consider investment objectives, risks, charges and expenses carefully before investing, including "Additional Risks" as described in the prospectus. To obtain a prospectus, which contains this and other information, call 1.866.759.5679 or visit www.alpsfunds.com. Read the prospectus carefully before investing.

* Robert Hyman is a Registered Representative of ALPS Distributors, Inc.

ALPS Advisors, Inc. and CoreCommodity Management, LLC are registered with the CFTC as the Commodity Pool Operator and respectively as the Commodity Trading Advisor and both are NFA members.

The Fund's investments may subject the Fund to significantly greater volatility than investments in traditional securities and involve substantial risks, including risk of a significant portion on their principal value.

The commodities markets and the prices of various commodities may fluctuate widely based on a variety of factors. Because the Fund's performance is linked to the performance of highly volatile commodities, investors should consider purchasing shares of the Fund only as part of an overall diversified portfolio and should be willing to assume the risks of potentially significant fluctuations in the value of the Fund. The Fund invests in commodity futures related investments, which are derivative instruments that allow access to a diversified portfolio of commodities without committing substantial amounts of capital. Additional risks of Commodity Futures Related Investments include liquidity risk and counterparty credit risk. Counterparty Risk is the risk that a party to a transaction will fail to fulfill its obligations. The term is often applied specifically to swap agreements in which no clearinghouse guarantees the performance of the contract. Liquidity Risk is the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimize a loss.

2017 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its three-, five- and

ten-year (if applicable) Morningstar Rating™ metrics. As of September 30, 2017, the ALPS | CoreCommodity Management CompleteCommodities Strategy Fund was rated against the following numbers of Commodities Broad Basket funds over the following time periods: 110 funds in the last three years and 87 funds in the last five years. With respect to these Commodities Broad Basket funds, ALPS | CoreCommodity Management CompleteCommodities Strategy Fund, I shares received a Morningstar Rating™ of 5 stars for the overall, 4 stars for three-year period and 5 stars for the five-year period. A and C Shares received a Morningstar Rating™ of 4 stars for the overall, 3 stars for the three-year period and 4 stars for the five-year period. Other classes may have different performance characteristics. Past performance is no guarantee of future results.

Another principal risk of investing in the Fund is equity risk, which is the risk that the value of the securities held by the Fund will fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate or factors relating to specific companies in which the Fund invests. The Fund's investments in non-U.S. issuers may be even more volatile and may present more risks than investments in U.S. issuers. Equity investments in commodity-related companies may not move in the same direction and to the same extent as the underlying commodities.

Commodity Swap Contract: A swap in which exchanged cash flows are dependent on the price of an underlying commodity. A commodity swap is usually used to hedge against the price of a commodity.

The Thomson Reuters/CoreCommodity CRB Index and the Bloomberg Commodity Index are unmanaged indexes used as a measurement of change in commodity market conditions based on the performance of a basket of different commodities. An investor cannot invest directly in an index.

Thomson Reuters/CoreCommodity CRB Index is a service mark of Thomson Reuters and CoreCommodity Indexes, LLC ("CCI") or their affiliates. CCI and Thomson Reuters may make changes to the CRB Index without regard to the resulting impact on client accounts and may receive index licensing fees.
