

ALPS | SMITH TOTAL RETURN BOND FUND

SMTHX • SMTRX • SMAMX • SMCHX

December 31, 2018

Experienced Team. Risk-Adjusted Returns. Capital Preservation.

Why is a Total Return Bond Fund right for you?

Core Portfolio Holding:

- Risk Adjusted Return – Generating returns utilizing bottom up fundamental analysis with a macro overlay. Introduces lower risk and produces greater returns.
- Capital Preservation – Focus on preserving capital in a rising interest rate environment.
- Risk Diversification – Diversify the risk in your portfolio potentially presenting less volatility and lower correlations.

Investment Objective:

The Fund seeks to obtain a total maximum return, consistent with preservation of capital.

[†] S&P ratings assist investors by evaluating the credit worthiness of many bond issues. AAA to BBB ratings are typically issued to those securities considered investment grade. The credit ratings typically range from AAA (highest) to D (lowest). The rating is not a recommendation to buy or sell a particular bond. For information on the rating agency's methodology go to: <http://www.standardandpoors.com/home/en/us>.

	Fund Information		Fund Yields as of 12/31/18	
	Weighted Avg Maturity (years)	Effective Duration (years)	SEC Standardized 30-Day Yield ¹	Unsubsidized 30-Day Yield ²
ALPS Smith Total Return Bond Fund	7.08	5.45		
Class I			2.59%	2.21%
Class Inv			2.21%	1.80%
Class A			2.09%	1.70%

Bloomberg Barclays US Aggregate Bond Index (Benchmark)	1.84%	1.64%	1.66%	N/A	1.66%

Performance data quoted represent past performance. Past performance is no guarantee of future results so that shares, when redeemed may be worth more or less than their original cost. The investment return and principal value will fluctuate. Current performance may be higher or lower than the performance quoted. For the most current month-end performance data please call 866.759.5679. Performance includes reinvested distributions and capital gains.

Contingent Deferred Sales Charge (CDSC) performance for Class C shares includes a 1% CDSC on C shares redeemed within 12 months of purchase. Performance shown at Net Asset Value (NAV) does not include these sales charges and would have been lower had it been taken into account.

Partnership

ALPS Advisors

- Headquartered in Denver, CO with over 25 years of experience and over 18 billion (as of 9/30/18) in assets under management, ALPS Advisors has a strong track record of providing innovative investment solutions to financial advisors and institutional investors.
- We specialize in real asset, alternative, factor, thematic and fixed income investment strategies that are designed to help investors build better portfolios. We believe superior investment results are achieved by partnering with best in class managers, with dedicated asset class expertise.

Smith Capital Investors

Philosophy

- We believe that an actively-managed, fundamentally-driven investment process leads to consistent performance. Our focus centers on risk-adjusted returns and the preservation of capital. We find our key philosophical differentiator to be in our commitment to a collaborative and ethical culture.

The Smith Team Experience

- Smith's investment-centric team averages 15+ years of experience, including previous rising rate environments. Their results are driven by a process with deep roots in fundamental research, complemented by quantitative validation and use of technology.

Important Disclosures & Definitions

An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contains this and other information, call 1.866.759.5679 or visit www.alpsfunds.com. Please read the prospectus carefully before investing.

An investment in the Funds involves risk, including loss of principle.

Please note that the Funds are new and have limited operating history.

Fixed Income Securities Risk. A rise in interest rates typically causes bond prices to fall. The longer the duration of the bonds held by a fund, the more sensitive it will likely be to interest rate fluctuations. Duration measures the weighted average term to maturity of a bond's expected cash flows. Duration also represents the approximate percentage change that the price of a bond would experience for a 1% change in yield. For example: the price of a bond with a duration of 5 years would change approximately 5% for a 1% change in yield. The price of a bond with a duration of 10 years would be expected to decline by approximately 10% if its yield was to rise by +1%. Bond yields tend to fluctuate in response to changes in market levels of interest rates. Generally, if interest rates rise, a bond's yield will also rise in response; the duration of the bond will determine how much the price of the bond will change in response to the change in yield.

The Fund's investments in fixed-income securities and positions in fixed-income derivatives may decline in value because of changes in interest rates. As nominal interest rates rise, the value of fixed-income securities and any long positions in fixed-income derivatives held by the Fund are likely to decrease, whereas the value of its short positions in fixed-income derivatives is likely to increase.

Market Risk. Overall securities market risks may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign economic growth and market conditions, interest rate levels, and political events affect the securities and derivatives markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.

Bloomberg Barclays US Aggregate Bond Index: provides a measure of the performance of the U.S. dollar denominated investment grade bond market, which includes investment grade government bonds, investment grade corporate bonds, mortgage pass through securities, commercial mortgage backed securities and asset backed securities that are publicly for sale in the United States.
