## Benefits of Asset Allocation Using ETFs

Exchange-Traded Funds offer unique benefits when constructing an allocation:

- Diversification** – instant exposure to a variety of asset classes
- Transparency** – sponsor, or provider, announces the contents of portfolio at the beginning of each business day
- Low Expense Ratios<sup>(b)</sup>** – allow for a fully-allocated portfolio at a similar cost to a single asset class fund
- Flexibility<sup>(c)</sup>** – high liquidity enables fast, easy moves among asset classes

<sup>(b)</sup> Ordinary brokerage fees apply.

<sup>(c)</sup> ETFs are considered to have continuous liquidity because they allow for an individual to trade throughout the day.

<sup>(d)</sup> Actual asset class weightings will change periodically in response to market conditions.

<sup>(e)</sup> The current allocations are slightly over or under-weight to the strategic models to take advantage of market opportunities.

<sup>(f)</sup> Cash position shown includes all amounts related to pending purchases and sales of investment securities.
