RiverFront Investment Group

RiverFront Investment Group is a global asset manager utilizing a dynamic investment approach with uncommon transparency. We are a registered investment advisor whose employees maintain majority ownership. RiverFront provides flexible, risk managed solutions optimized according to investment time horizons and risk tolerances.

Dynamic Investment Process

Global Strategic Allocation with Tactical Tilts

- 1 We design dynamic strategic allocation models.** Value drives our long-term allocation strategy. We believe the price you pay for an asset class is a key determinant of returns over time.
- 2 We tactically adjust the models.** This long-term strategy is then modified with tactical tilts designed to accommodate current market trends, putting greater weight on asset classes that have positive momentum. In other words, our asset allocation strategy seeks to combine our judgment of value with our sense of momentum, making our largest allocations when our evaluation of value and momentum are aligned.
- 3 We offer “the world in one account”,** meaning that we research and implement investments on a global basis. To do this successfully, we implement fundamental and technical disciplines into our security selection process.
- 4 We practice both proactive and reactive risk management** which includes putting tactical plans in place for a myriad of scenarios.

Acquired Fund Fees:	0.68%	0.68%	0.68%	0.68%
Total Expense Ratio:	1.18%	1.18%	1.93%	0.93%

Description

The RiverFront Asset Allocation Growth (the “Fund”) seeks to provide high total investment return through a fully managed investment policy utilizing United States and foreign equity securities, debt and money market securities, the combination of which will be varied from time to time both with respect to types of securities and markets in response to changing market and economic trends. Total investment return means the combination of capital appreciation and investment income. The Fund is designed to meet investor needs for a diversified portfolio solution with a defined risk objective of growth. The Fund’s portfolio is built around a long-term strategic allocation which allocates the Fund’s investments to large cap stocks, small and mid cap stocks, international securities (including emerging markets), and bonds. The Fund will normally be invested in 80% equity securities (including common stock and ETFs) and 20% fixed income securities (including corporate debt and ETFs). The fixed-income securities may be of any quality or duration. The portfolio management team may depart from the targeted allocation range when they feel that certain sectors of the financial markets are over- or under-valued.

We are

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance data may be higher or lower than actual data quoted. For the most current month-end performance data please call 1-866-759-5679.

Performance shown at NAV does not include these sales charges and would have been lower had it been taken into account. A Contingent Deferred Sales Charge ("CDSC") of 1.00% may apply to Class C shares redeemed within the first 12 months.

Effective February 28, 2018, the RiverFront Global Allocation Fund changed its name to the RiverFront Asset Allocation Growth.

Effective June 12, 2018, Class A shares of the RiverFront Asset Allocation Growth were added as a new available fund class. Performance for Class A Shares prior to June 12, 2018 reflects the historical performance of the respective Fund's Investor Class Shares, calculated using the fees and expense of Class A Shares.

¹ Performance less than 1 year is cumulative.

² Fund inception date of 8/2/10.

³ MSCI ACWI is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes. An investor may not invest directly in an index.

⁴ The Barclays US Aggregate is an unmanaged index composed of securities from the Barclays Capital Government/Corporate Bond Index, Mortgage-Backed Securities Index and the Asset-Backed Securities Index. An investor may not invest directly in an index.

Important Disclosures & Definitions

An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contains this and other information, please contact your investment professional. Read the prospectus carefully before investing.

The performance of the Fund relative to its benchmark will depend largely on the decisions of the RiverFront Investment Group, LLC (the "Sub-Advisor" or "RiverFront") as to strategic asset allocation and tactical adjustments made to the asset allocation. At times, RiverFront's judgments as to the asset classes in which the Fund should invest may prove to be wrong, as some asset classes may perform worse than others or the equity markets generally from time to time or for extended periods of time. The performance of the Fund is related to the economic sectors that RiverFront may choose to emphasize or deemphasize from time to time, as well as to the individual securities selected by RiverFront within those sectors. The investment returns for particular economic sectors will fluctuate and may be lower than other sectors. In addition, the individual securities chosen for investment within a particular sector may underperform other securities within that same sector. Certain stocks selected for the Fund's portfolio may decline in value more than the overall stock markets.
