RiverFront Investment Group

RiverFront Investment Group is a global asset manager utilizing a dynamic investment approach with uncommon transparency. We are a registered investment advisor whose employees maintain majority ownership. RiverFront provides flexible, risk managed solutions optimized according to investment time horizons and risk tolerances.

Dynamic Investment Process

Global Strategic Allocation with Tactical Tilts

- 1 We design dynamic strategic allocation models.** Value drives our long-term allocation strategy. We believe the price you pay for an asset class is a key determinant of returns over time.
- 2 We tactically adjust the models.** This long-term strategy is then modified with tactical tilts designed to accommodate current market trends, putting greater weight on asset classes that have positive momentum. In other words, our asset allocation strategy seeks to combine our judgment of value with our sense of momentum, making our largest allocations when our evaluation of value and momentum are aligned.
- 3 We offer "the world in one account",** meaning that we research and implement investments on a global basis. To do this successfully, we implement fundamental and technical disciplines into our security selection process.
- 4 We practice both proactive and reactive risk management** which includes putting tactical plans in place for a myriad of scenarios.

Description

The RiverFront Asset Allocation Moderate (the "Fund") has two primary investment objectives. It seeks (1) to provide a level of current income that exceeds the average yield on U.S. stocks in general and (2) to provide a growing stream of income over the years. The Fund's secondary objective is to provide growth of capital. The Fund is designed to meet investor needs for a diversified fund solution with a defined risk objective of moderate growth. The Fund is built around a long-term strategic allocation which allocates the Fund's investments to large cap stocks, small and mid cap stocks, international securities, bonds, etc. The Moderate Growth & Income Fund will normally be invested in 50% equity and 50% fixed income securities. The Fund's management team may depart from the targeted allocation range when they feel that certain sectors of the financial markets are over- or under-valued.

Important Disclosures & Definitions

An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contains this and other information, please contact your investment professional. Read the prospectus carefully before investing.

The performance of the Fund relative to its benchmark will depend largely on the decisions of the RiverFront Investment Group, LLC (the "Sub-Advisor" or "RiverFront") as to strategic asset allocation and tactical adjustments made to the asset allocation. At times, RiverFront's judgments as to the asset classes in which the Fund should invest may prove to be wrong, as some asset classes may perform worse than others or the equity markets generally from time to time or for extended periods of time. The performance of the Fund is related to the economic sectors that RiverFront may choose to emphasize or deemphasize from time to time, as well as to the individual securities selected by RiverFront within those sectors. The investment returns for particular economic sectors will fluctuate and may be lower than other sectors. In addition, the individual securities chosen for investment within a particular sector may underperform other securities within that same sector. Certain stocks selected for the Fund's portfolio may decline in value more than the overall stock markets.

The value of the Fund's investments in fixed-income securities will generally decrease when interest rates rise, which means the Fund's NAV will likewise decrease.
