

# ALPS | O'Shares Europe Quality Dividend ETF

Ticker: OEUR

Fact Sheet as of June 30, 2025

## Investment Strategy

The ALPS | O'Shares Europe Quality Dividend ETF (OEUR) is designed to provide efficient and transparent access to a portfolio of large-cap and mid-cap dividend paying companies in Europe selected based on several fundamental metrics such as:

**QUALITY • LOW VOLATILITY • DIVIDEND GROWTH**

## Why OEUR?

- **Quality Europe Growth Stocks:** Seeks European companies with strong balance sheets, profitability and dividend quality.
- **Performance:** Aims to provide strong performance with less risk.
- **Reduced Risk of Yield Traps:** Emphasis on dividend quality to help avoid dividend cuts and suspensions.

## ETF Advantages

OEUR is a passively managed fund with all of the structural benefits of an ETF.

\* Upon redemption, the ETF issuer delivers underlying securities "in kind" which can reduce the fund's tax burden and provide higher after tax returns for investors.

\*\* Ordinary brokerage fees apply. This notice is provided to you for informational purposes only, and should not be considered tax advice. Please consult your tax advisor for further assistance.

## Important Disclosures & Definitions

**An investor should consider the investment objectives, risks, charges and expenses carefully before investing. This material must be preceded or accompanied by the [prospectus](#). Read the prospectus carefully before investing.**

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Diversification does not eliminate the risk of experiencing investment losses.

Concentration in a particular industry or sector will subject the Fund to loss due to adverse occurrences that may affect that industry or sector. The Fund may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. A Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in US securities. Exposures to foreign securities entail special risks, including political, diplomatic, economic, foreign market and trading risks. In addition, a Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the US dollar, which may affect the Fund's returns.

The Fund employs a "passive management" - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.

30-Day SEC Yield: reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses.

EURO STOXX 50 Net Return USD Index: represents the performance of the 50 largest companies among the 20 supersectors in terms of free-float market cap in Eurozone countries.

FTSE Developed Europe Qual/Vol/Yield 5% Capped Factor Index: designed to measure the performance of publicly-listed large-capitalization and mid-capitalization dividend-paying issuers in Europe that meet certain requirements for market capitalization, liquidity, high quality, low volatility and dividend yield.

O'Shares Europe Quality Dividend Index: designed to reflect the performance of publicly-listed large-capitalization and mid-capitalization dividend-paying issuers in Europe that meet certain market capitalization, liquidity, high quality, low volatility and high dividend yield thresholds. The quality and low volatility requirements are designed to reduce exposure to high dividend equities that have experienced large price declines.

Trailing Twelve Month Yield: refers to the percentage of income a portfolio has returned to investors over the last 12 months.
