

ALPS Sector Dividend Dogs ETF

Ticker: SDOG

Fact Sheet as of June 30, 2025

Value, Income, Diversification

The ALPS Sector Dividend Dogs ETF (SDOG) is an Exchange-Traded Fund that applies the 'Dogs of the Dow Theory' on a sector-by-sector basis using the S-Network US Equity WR Large-Cap 500 Index (SNR 500) as its starting universe of eligible securities. This strategy provides the following potential benefits:

- **High Dividend Yield Relative to US Large Cap Indices** – Starting with a large-cap universe such as the SNR 500 diminishes the likelihood of troubled and financially distressed companies entering the Index and allows dividend yield to be the primary selection criterion for the Index.
- **Sector and Stock Diversification** – SDOG provides high dividend exposure across all 10 sectors of the market by selecting the five highest yielding securities in each sector and equally weighting them. This provides diversification at both the stock and sector level.
- **Dogs Theory** – SDOG isolates the SNR 500 constituents with the highest dividend yield in their respective sectors providing the potential for price appreciation as market forces bring their yield into line with the overall market.

Investment Objective

The Fund seeks investment results that replicate as closely as possible, before fees and expenses, the performance of the S-Network Sector Dividend Dogs Index (SDOGX).

Fund Details

Ticker:	SDOG

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. This material must be preceded or accompanied by the [prospectus](#). Read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

The Fund is subject to the additional risks associated with concentrating its investments in companies in the market sector.

Diversification does not eliminate the risk of experiencing investment losses.

The Fund employs a "passive management" - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.

30-Day SEC Yield: reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses.

30-Day SEC Yield (Unsubsidized): reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses, excluding fee waivers.

Dogs of the Dow Theory: an investment strategy which proposes that an investor annually select for investment the ten Dow Jones Industrial Average stocks whose dividend is the highest fraction of their price.

S-Network Sector Dividend Dogs Index (SDOGX): a rules-based index intended to give investors a means of tracking the overall performance of the highest dividend paying stocks in the SNR 500 on a sector-by-sector basis. The SNR 500 includes the 500 largest US stocks by market capitalization.

S&P 500 Index: widely regarded as the best single gauge of large-cap US equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization.

Trailing Twelve Month Yield: refers to the percentage of income a portfolio has returned to investors over the last 12 months.

One may not invest directly in an index.
