All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Diversification does not eliminate the risk of experiencing investment losses.

The performance of the Fund relative to its benchmark will depend largely on the decisions of the RiverFront Investment Group, LLC (the “Sub-Adviser” or “RiverFront”) as to strategic asset allocation and tactical adjustments made to the asset allocation. At times, RiverFront’s judgments as to the asset classes in which the Fund should invest may prove to be wrong, as some asset classes may perform worse than others or fixed income markets generally from time to time or for extended periods of time. The performance of the Fund is related to the market sectors that RiverFront may choose to emphasize or deemphasize from time to time, as well as to the individual securities selected by RiverFront within those sectors. The investment returns for particular market sectors will fluctuate and may be lower than other sectors. In addition, the individual securities chosen for investment within a particular sector may underperform other securities within that same sector. Certain bonds selected for the Fund’s portfolio may decline in value more than the overall bond markets.

The value of the Fund’s investments in fixed-income securities will generally decrease when interest rates rise, which means the Fund’s NAV will likewise decrease.

30-Day SEC Yield: reflects the dividends and interest earned during the period, after the deduction of the Fund’s expenses.

30-Day SEC Yield (Unsubsidized): reflects the dividends and interest earned during the period, after the deduction of the Fund’s expenses, excluding fee waivers.

Bloomberg US Aggregate Bond Index: a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, fixed-rate agency MBS, ABS and CMBS (agency and non-agency). One may not invest directly in an index.

Modified Duration: a modified version of the Macaulay duration that is a direct measure of how much a bond’s price changes when its yield changes. It is calculated by dividing the Macaulay duration by yield plus one.

Price Matters®: a discipline of the RiverFront Investment Group that compares inflation-adjusted current prices relative to their long-term trend to help identify extremes in valuation.
