ALPS Sector Dividend Dogs ETF

2024 Annual Reconstitution

Potential benefits of annual reconstitution of the five highest yielding securities in each of the 10 sectors* of the S-Network US Equity Large-Cap 500 Index (SNR 500):

High Dividend Yield Relative to US Large Cap Dividend Indices

Simple yield screen ensures that the portfolio will add securities whose yield has increased and remove those securities whose yield has fallen relative to the sector average.

'Dogs Theory'^{***}

Screen generally results in adding securities whose prices have significantly trailed the average return for their respective sector. 'Dogs Theory' suggests that these companies may be closer to the bottom of their business cycle and are likely to see their price appreciate faster relative to their lower yielding peers.

Diversification

Isolating screen on a sector-by-sector basis ensures portfolio will have equal sector allocation rather than creating a selection bias to higher yielding sectors.

* Excluding real estate. ** Dogs of the Dow Theory: an investment strategy which proposes that an investor annually select for investment the ten Dow Jones Industrial Average stocks whose dividend is the highest fraction of their price. ¹ Trailing Twelve Month Yield: refers to the percentage of income a portfolio has returned to investors over the last 12 months. ² Price/Earnings (P/E) Ratio: a valuation ratio of a company's current share price compared to its per-share earnings. ³ Price/Earnings (P/E) Ratio using Fiscal Year 1 Estimate: an equity valuation multiple. It is defined as market price per share divided by estimated earnings per share for the next fiscal year. ⁴ S-Network Sector Dividend Dogs Index (SDOGX): a rules-based index intended to give investors a means of tracking the overall performance of the highest dividend paying stocks in the S-Network US Equity Large-Cap 500 Index (SNR 500) on a sector-by-sector basis. The SNR 500 includes the 500 largest US stocks by market capitalization. ⁵ S&P 500 Index: widely regarded as the best single gauge of large-cap US equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization. One may not invest directly in an index.

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. This material must be preceded or accompanied by the prospectus. Read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted. All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

The Fund is subject to the additional risks associated with concentrating its investments in companies in the market sector.

Diversification does not eliminate the risk of experiencing investment losses.

The Fund employs a "passive management" - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.

(Net) Yield: the ratio of net dividends per share that have gone "ex" in the past 12 months and closing price, multiplied by 100, as of the date of analysis.
